

FIBREX™

DESCRIPTION

FibreX is compressed into weather-proof totes (approximately 4'x4'x4'). The totes offer protection to maintain quality and offer significant cost savings when mixing in wet, muddy or snowy conditions.

PACKAGING

FibreX is supplied in weather proof, pvc bags palletized for oil field warehousing, delivery and supply. Bags weigh an average of 12 lbs each. The bags are stacked 75 to a pallet and compressed then Shrink wrapped for additional weather protection.

TRANSPORTATION & STORAGE

The compression of product into a 47" x 47" x 52" area, increases the efficiency of both storage and transportation costs. The pallet can be transported 2 wide and 2 high on a van or flat deck trailer.

PRODUCT TECHNICAL INFORMATION

Fibre Source	Clean wood fibre shavings; hammer milled
Moisture Content	< 4% by weight
Particle Size	<5 mm (1/4 inch)
